Standards

Our products adhere to globally recognised standards, undergo independent testing and utilise data-backed approaches to understand each product's capabilities, ensuring absolute peace of mind.

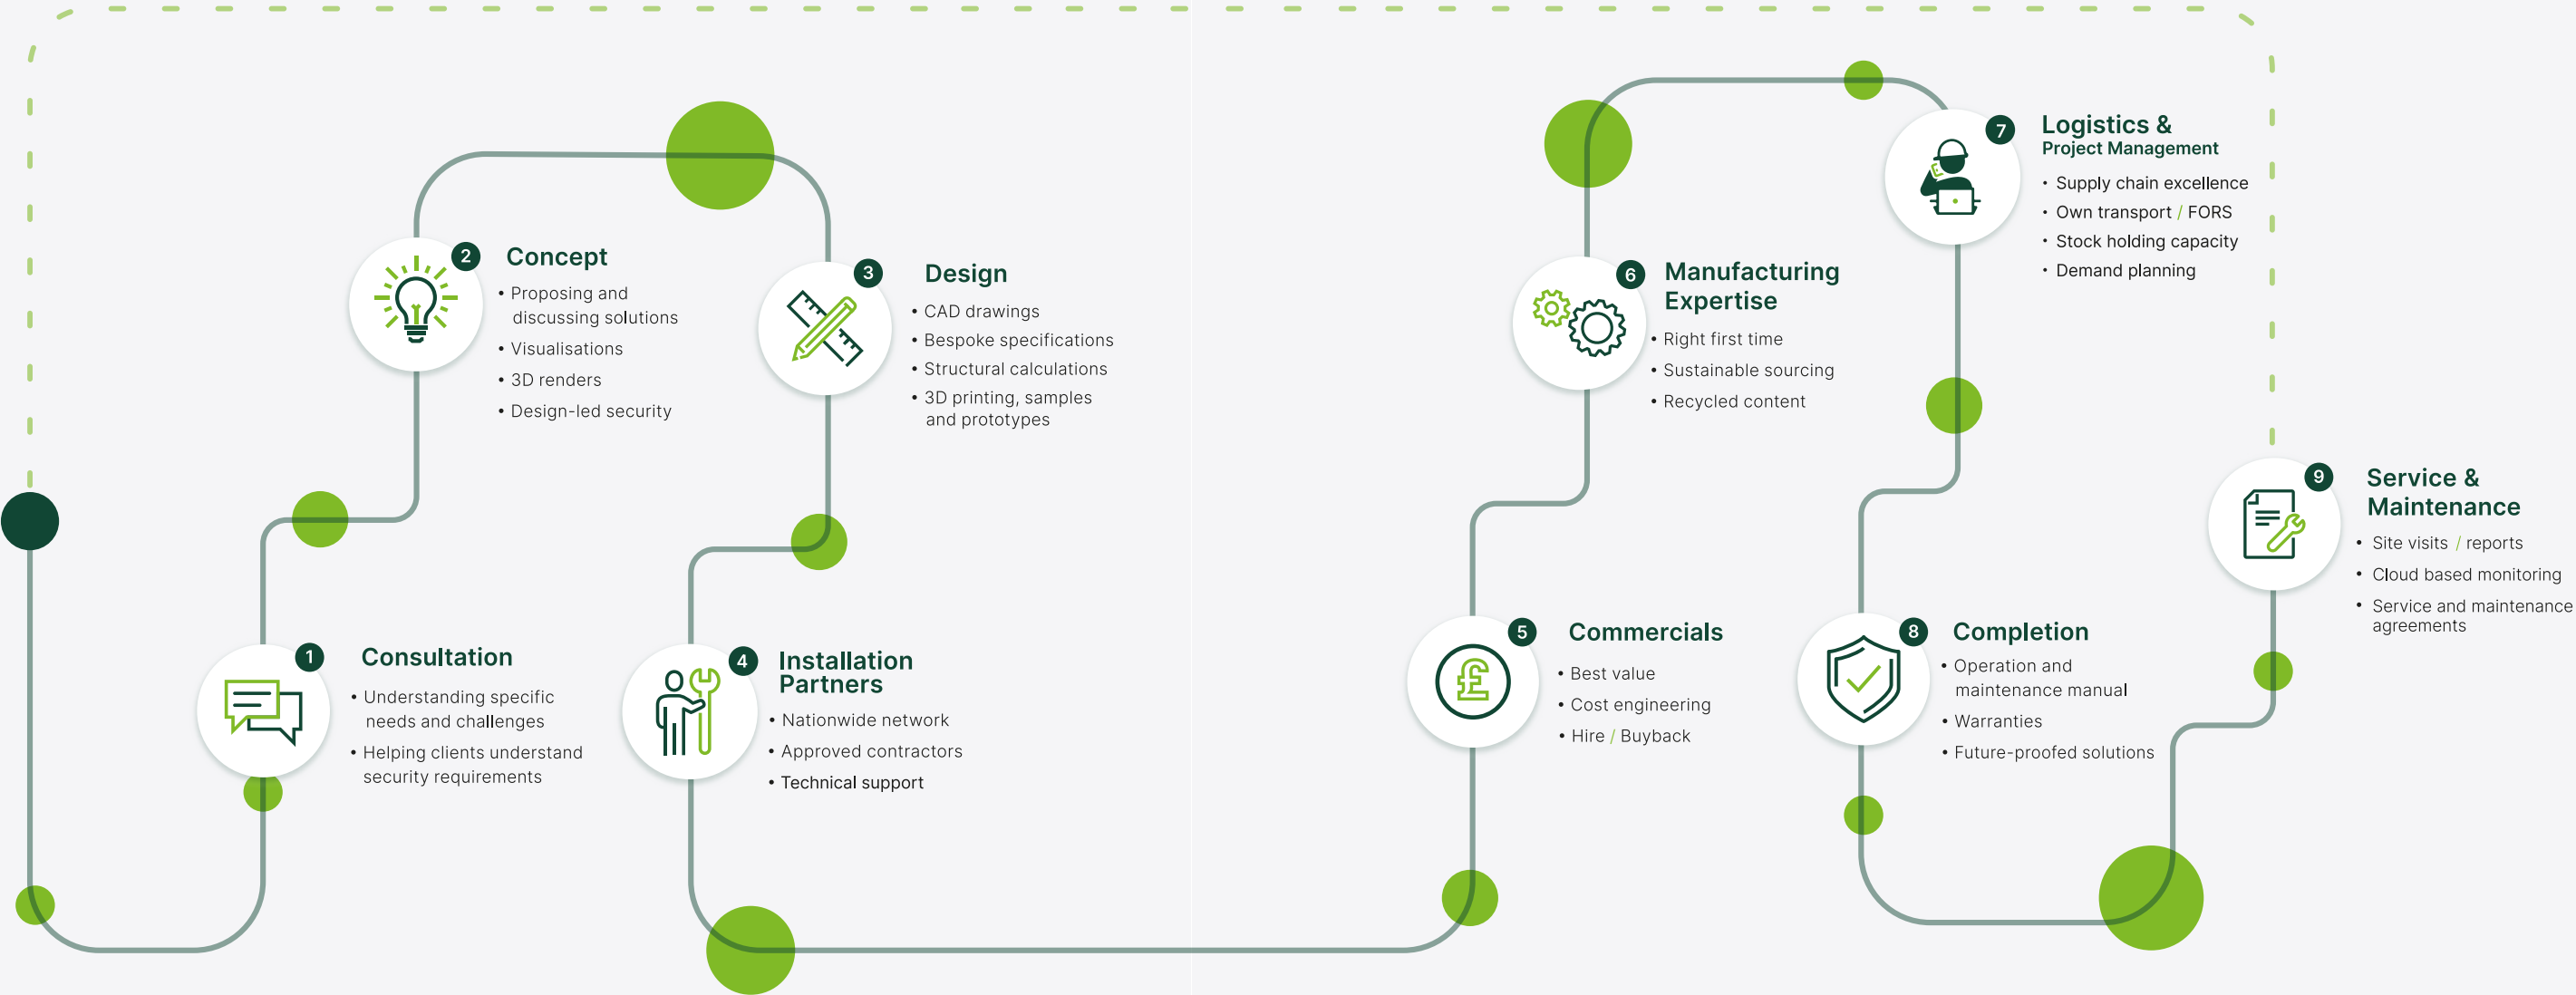

Our Approach

About us

As a world leader in physical security solutions, CLD takes pride in over 50 years of experience, delivering innovative and market leading security fencing and access control systems. Our solutions are tailored to each site's needs, ensuring safe, secure, and sustainable protection.

With offices in multiple global locations, including our headquarters in Sandbach, Cheshire, trust CLD to meet your physical security requirements to the highest standard.

Sustainability

CLD Physical Security Systems is dedicated to promoting sustainability and reducing waste in its operations. We strive to support our customers and colleagues in making responsible choices for a greener future.

80%

Recycled plastic used in our hoarding

100%

Recycled plastic used in our FenceSafe bases

78%

The amount of recycled steel used in all of CLD's steel fencing and posts

We are actively reevaluating our approach and engaging specialists to make a meaningful and measurable difference in sustainability.

We have already achieved significant milestones on our sustainability journey, including:

ISO 14001 Environmental Management System

Our approach has accelerated with the implementation of the ISO: 14001 Environmental Management System.

This international standard offers us a framework that helps us manage the impact that our businesses have on the environment.

It guarantees to our stakeholders that we comply with all legislation, regulations, and other environmental requirements. It also gives us the tools to make continual improvements to our performance.

EcoVadis

In 2021 we received a Silver Medal in recognition of sustainability achievement from EcoVadis. The Ecovadis Sustainability Scorecard assesses our performance against 21 indicators across 4 themes:

- Environment
- Labour and Human Rights
- Ethics
- Sustainable procurement

The EcoVadis assessment gives us more signposts for improvement so that we can secure a Gold Medal in the future.

Planet Mark

It is well known that in business you can't manage what you can't measure. It is vital that we can measure the continuous improvements we are making. CLD is working closely in partnership with Planet Mark, to measure our carbon emissions, energy and water consumption, travel and waste. Planet Mark also supports us with an understanding of how our social activities impact on the community.

Sustainable procurement

All of CLD's steel fencing and posts are manufactured from at least 78% recycled British and European steel, and our FenceSafe bases are manufactured from 100% recycled plastic and our hoarding from at least 80% recycled plastic.

All our steel products are widely recyclable. Furthermore, the panels used in our innovative FenceSafe temporary fencing solutions can be repurposed for use in the permanent fence line, making them the perfect sustainable solution.

Transport is another crucial area that we are looking to improve. We operate our own dedicated logistics department, which holds FORS Silver across its fleets.

Our Systems

On Ground

Physical Security Systems

Discover our range of flexible and robust on ground physical security solutions.

FenceSafe
Permanent Level Security which Leaves No Trace
A smart, versatile solution allowing easy relocation and conversion into a permanent solution, reducing complexity and cost, made from 100% recycled plastic.

HoardSafe
Safety, Security and Sustainability
Innovative site hoarding made from recycled plastic that can be installed on-ground or in-ground, giving flexibility to create a permanent fence-line.

ModSec
A Revolution In Security
Versatile modular physical security system that deters attacks, can be installed on-ground or in-ground, and features a built-in wire channel for electronic detection systems.

CLD FenceSafe Dulok Lite

On ground/temporary double wire panel system

Find out more
Scan for more information

Description

FenceSafe Dulok Lite offers a traditional general-purpose wire fenceline in an on-ground, temporary format and sustainable format. Manufactured from twin 6mm horizontal wires, either side of 5mm diameter vertical wires, installed using CLD's unique FenceSafe Base, made from 100% recycled plastic and 90% recycled UK and European steel, both elements of the system can be used over and over again.

Features

Anti-cut through panels

Flat Panel to accomodate debris netting

Steel security clip with security pn hex screw

CLD FenceSafe Eclipse

On ground/temporary double wire panel system

Find out more
Scan for more information

Description

CLD Eclipse is a general-purpose perimeter fencing system offering a cost effective and attractive fenceline. With projecting spikes, Eclipse is difficult to climb over offering a good deterrent against vandals and intruders. FenceSafe Eclipse is on on-ground/temporary version, which is installed using CLD's FenceSafe Base unit. Both base unit and mesh panels can be reused again and again offering a highly cost-effective and sustainable perimeter solution.

CLD FenceSafe Securus SR1

On-ground & Temporary fencing system rated to LPS 1175 SR1 Issue 7

Minimum of 60 Seconds
delay against attack

Find out more
Scan for more information

Description

Offering safety, security and sustainability, CLD's FenceSafe Securus SR1 system is the world's first LPS 1175 security rated temporary fencing system. Using our innovative foundation-free cantilevered FenceSafe base coupled with our Securus 358 mesh fencing, the system is guaranteed to offer at least 60 seconds delay against attack. The panels can even be re-used in a permanent fenceline.

Features

- Overlapping panels for added security
- Full length clamp bar with no external fixings
- Through bolt with rear fastening
- Anti-Climb 358 mesh panels
- Hire or Purchase options

CLD FenceSafe-E

On-ground & Temporary profiled monitored pulse fence

Find out more
Scan for more information

Description

FenceSafe-E is the world's first temporary security fence with active monitored pulse fencing. Part of the revolutionary FenceSafe range of temporary rigid mesh fencing systems, it requires zero ground strike allowing rapid deployment anywhere around the globe. By utilising pre-assembled modular end, return and adjustable corners, the entire system can be installed in record time. In development trials over 30m of the system was installed and commissioned in under 90 minutes.

Features

- Zero ground strike
- Easy fixing security clips
- Fully resistant welded joints with 5mm wires
- 30mm projecting spikes

CLD HoardSafe

On Ground & Temporary site hoarding system

Description

HoardSafe is CLD's range of sustainable and secure hoarding. Manufactured from composite recycled plastic panels which click easily into place and are installed on steel rails. The system can be fixed to blocks or ground buried. CLD's range of permanent fencing can easily be installed after the hoarding is removed, using the existing posts. HoardSafe can be vinyl wrapped with custom designs and re-used multiple times.

CLD HoardSafe S1

High security site hoarding system to LPS 1175 A1 (SR1) Issue 8

Minimum of 60 Seconds
delay against attack

Description

HoardSafe S1 offers a security perimeter, with the benefits of a hoarding system. Manufactured from composite recycled plastic panels which click easily into place and are installed on steel rails. HoardSafe S1 is a security-rated version which incorporates a Securus steel mesh panel to the rear which has been certified by the Loss Prevention Certification Board to provide a minimum of 60 seconds against attack. The system can be fixed to blocks or ground buried. HoardSafe can be vinyl wrapped with an advertising message and can be re-wrapped for use.

Introducing the **RiseMaster HE**

RiseMaster HE, a fully autonomous off-grid, solar-powered boom arm barrier system with unmatched sustainability, safety, performance, and versatility. It features photovoltaic solar panels for zero carbon emissions, complies with BS EN 12453:2017 safety standards, has 4G Wi-Fi connectivity, and can be permanently or temporarily installed without road-crossing cabling. Upgrade to the RiseMaster HE for the future of access control.

Our Systems

On Ground Access Control

Physical Security Systems

Explore our range of temporary access control solutions, providing secure and seamless control over your premises

Barriers

Off Grid, Solar-Powered

Lift arm barriers can be used to control access to entrance ways and car parks, providing an economic yet strong way of deterring unauthorised access.

Gates

Swing, Bi-Fold & Sliding Options

Every fence line needs at least one gate to allow for the safe passage of people and vehicles, and ours fit seamlessly with every fencing system we offer.

Turnstiles

Pedestrian Access

High security for site entry and exit, available in bi-directional or single direction operation allowing you to determine how they are used within the overall fence line

CLD RiseMaster HE Barrier

CLD Auto Access Barrier System

Description

The CLD RiseMaster HE Barrier is a fully autonomous off grid, solar powered automatic boom arm barrier system. It is available in both surface mount version - free standing and rapidly deployable - as well as permanent version, and is incorporated with photovoltaic panels. No road crossing cabling are required.

The Solar RiseMaster can power access control systems such as intercoms, radio transmitters and other equipment to be compliant with Safety Force Test Compliant to EN 12453:2017.

Find out more

CLD FenceSafe LockMaster

Permanent grade swing gates in a temporary format

Description

CLD FenceSafe LockMaster gates offer a permanent grade of security in a temporary or on-ground format. The gate is supplied complete with infills to match the fenceline and is installed using CLD's innovative FenceSafe 100% recycled bases. All CLD's temporary gates can be converted to permanent access control solutions. Fence-Safe LockMaster gates are available to suit site-specific needs, including various locking methods and additional security toppings.

CLD Rental Systems

High levels of service delivery, knowledge on the ground and exceptional products are at the heart of our business philosophy. It was with those values in mind that CLD created its Hire Division, enabling our customers to be able to access the highest levels of perimeter security on a rental basis.

Our Goal

Is to ensure you have exactly the fencing you need, for as long as you need it. We recognise that every project is unique. **Whether you think you need temporary fencing for a few weeks or a few years, our team can help.**

- We not only provide flexibility concerning hire durations but also offer complete adaptability in designing temporary perimeter solutions, including options for height, length, and even electrification.
- Access can be included within your temporary fenceline design, including swing gates, turnstiles, barriers and sliding gates
- Technical support is readily available from our expert team
- Deliveries are made using our own FORS Silver accredited CLD delivery team

Installer Partners

We prioritise exceptional products and installation, carefully selecting contractors who demonstrate professionalism and attention to detail in their business and services.

Our partners undergo training and receive regular updates to ensure their expertise in fencing for your projects

Global Operations

A global presence with local expertise.

CLD has gained a reputation for delivering best in class British-made security systems worldwide. Our global presence ensures that our customers can uphold a consistent and dependable level of physical security across all their international locations.
